

Modifying Firefox Cookie Settings

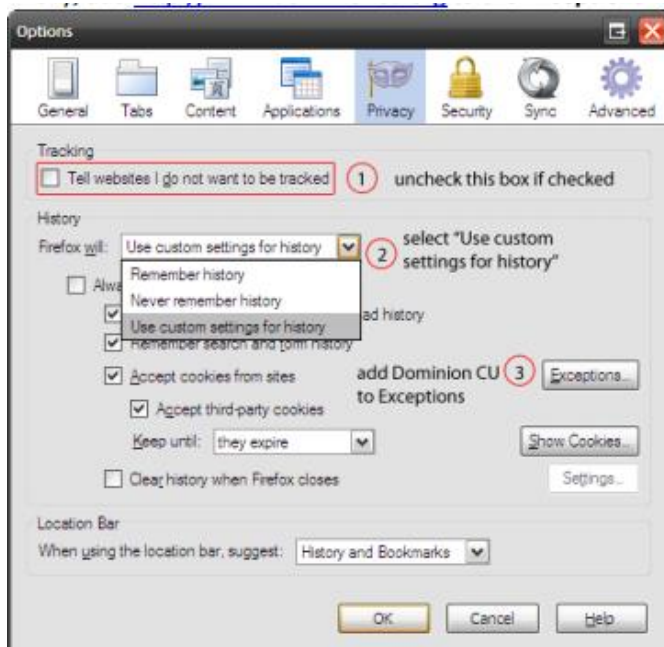

Please follow the steps below to ensure your Firefox browser is configured properly so that it is able to accept BMI Federal Credit Union cookies.

Click the Firefox button in the top-left corner of the browser. If you do not see this button, ensure the version you are using is the most current. Click [here](#) for more details.

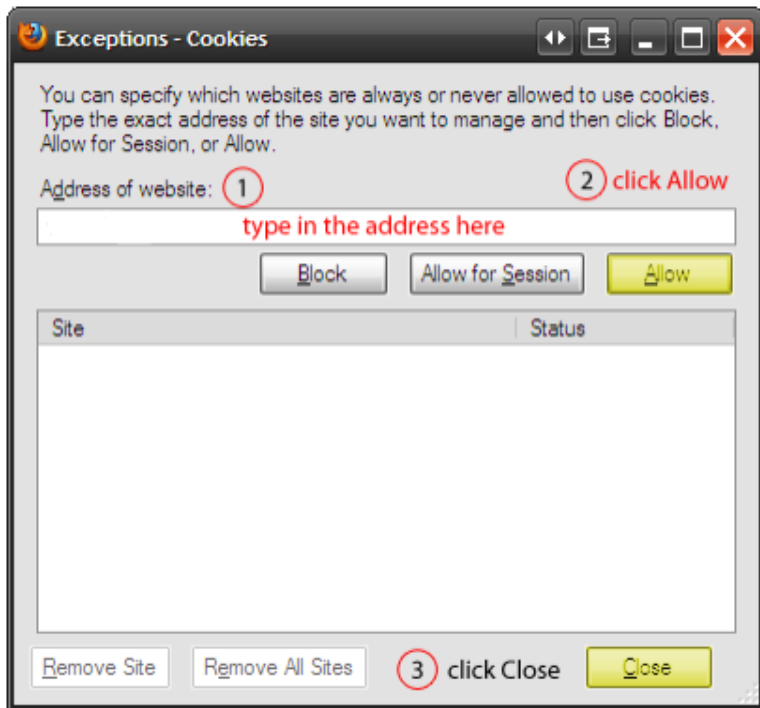

Select '**Options**' and then click the preceding '**Options**' menu once more.

Click the '**Privacy**' tab. First, uncheck the checkbox under the '**Tracking**' section. Next, under '**History**', select '**Use custom settings for history**' from the drop-down menu. Finally, add <https://www.bmifcu.org/index.html> to the '**Exceptions**' for Firefox (number 3 in the image below).

In the 'Exceptions' window, type the address of the website into the field below, and then click 'Allow'. Once you are finished, click 'Close'.

Complete this process again and type https://online.bmifcu.org/BMIFederalCreditUnionOnline_35/Authentication/Login.aspx into the above field to ensure BMI Federal Credit Union's Online Banking is accepted.

Close all windows and sessions of Firefox once you are finished. Upon restarting your Firefox browser, your new settings should be applied.
